

Dear patients of Taddle Creek Family Health Team,

Taddle Creek is starting to host flu shot clinics for patients of our team. These clinics will be located at our 790 Bay Street site at Bay and College in **suite 306**.

Due to demand, flu shot clinics are reserved for flu shots only (no other immunizations will be administered and other health concerns cannot be addressed). Please book an appointment time for each family member who plans to visit the clinic.

It is essential everyone wear a mask at all times in our building. Please wear clothing that allows you to expose your arm without having to take your top off. If you are accompanied by another person, we ask that this person wait outside the building (exception family flu shots). If you are early for your appointment we also ask that you wait outside the building.

Children from 6 months up to 9 years old, receiving their first ever flu shot, must have a booster dose 4 weeks following their first dose.

If you **book in the Health Myself portal**, you will receive an appointment reminder 24 hours prior to your appointment. This reminder will ask you to complete a 'Patient Documentation Form' and read a 'Flu Shot Information Sheet'. Once you complete the form it will automatically download to your medical chart making your appointment more efficient and safer. A form must be completed for every patient attending **including children**.

If you **book through your primary care provider's office**, they will email you the 'Patient Documentation Form' and the 'Flu Shot Information Sheet' (attached below) to complete, print and bring to your appointment. A form must be completed for every patient attending **including children**.

Please note that the 'Patient Documentation Form' has COVID-19 screening questions. If you answer **YES** to any question you should **NOT** book an appointment and visit a COVID-19 assessment center for testing.
